

# **L<sup>A</sup>T<sub>E</sub>X Template for Rackham Dissertations**

by

Jane R. Doe

A dissertation submitted in partial fulfillment  
of the requirements for the degree of  
Doctor of Philosophy  
(Mathematics)  
in the University of Michigan  
2019

## Doctoral Committee:

Professor John D. Brown, Co-Chair,  
Professor Emeritus Ann A. Smith, Co-Chair  
Dr. Alicia Gonzalez, Mellon Foundation  
Assistant Professor Charles Z. Jones  
Associate Professor Kathleen X. Lee, Yale University  
Associate Professor Horace H. Rackham

## **DEDICATION**

This manual is dedicated to all doctoral students at the University of Michigan's Horace H. Rackham School of Graduate Studies.

## **ACKNOWLEDGMENTS**

This template has been modified by a lot of people over the years. To the best of my knowledge, it's original version was written by Jin Ji in 1988. Modifications to it have since been made by Roque D. Oliveira in 1992, Jason Gilbert in 2008, Derek Dalle in 2011, and Umang Varma in 2019, and Jeremy Castagno in 2021. It is possible that other people have modified this document (in fact, there is a unattributed change in the changelog dated 1989.11.29).

## **PREFACE**

This disseration is a sample document using the `thesis-umich.cls` template.

# TABLE OF CONTENTS

<b>Dedication</b>	<b>ii</b>
<b>Acknowledgments</b>	<b>iii</b>
<b>Preface</b>	<b>iv</b>
<b>List of Algorithms</b>	<b>vi</b>
<b>List of Appendices</b>	<b>vii</b>
<b>Abstract</b>	<b>viii</b>
<b>Chapter</b>	
<b>1 Using This Template</b>	<b>1</b>
<b>Appendices</b>	<b>3</b>
A.1 Lists Including the Appendices	3
<b>Bibliography</b>	<b>4</b>

## LIST OF ALGORITHMS

### ALGORITHM

1.1	How to write algorithms . . . . .	2
-----	-----------------------------------	---

**LIST OF APPENDICES**

**A Example Appendix . . . . . 3**

## **ABSTRACT**

With walk through basic steps of using this  $\text{\LaTeX}$  template.

# CHAPTER 1

## Using This Template

The approach to this template is to result in  $\LaTeX$  source files (i.e., `.tex` files) that are as simple as possible. This is particularly useful for the first few pages, for example the title page, dedication, and abstract page, which are difficult to make in  $\LaTeX$  and are supposed to go in a certain order.

You are welcome to modify `thesis-umich.cls` to suit your needs or keep up with modifications to Rackham guidelines. I used this template to submit my dissertation in 2019, but Rackham can change their rules at any time. If you have not modified a `.cls` file before, but know how to define commands in  $\TeX$ , you should not have much trouble, apart from the sneaky `@` character, which behaves like a letter in `.cls` files but not in `.tex` (see “What do `\makeatletter` and `\makeatother` do?” on  $\TeX$  StackOverflow and “Makeatletter and Makeatother” on the  $\TeX$  Users Group for more information).

Finally, you should be able to use your preferred bibliography manager (BibTeX, BibLaTeX, NatBib, etc.). If the `\bibliography` command is giving you trouble, look in `thesis-umich.cls`, because it was modified there. You can also look at that code for help with formatting bibliographies that are displayed with other commands.

Here is an example algorithm. This will demonstrate that a list of appendices and a list of algorithms may co-exist.

---

**Algorithm 1.1:** How to write algorithms

---

**Result:** Write here the result

```
1 initialization;
2 while While condition do
3   instructions;
4   if condition then
5     instructions1;
6     instructions2;
7   else
8     instructions3;
9   end
10 end
```

---

## **APPENDIX A**

### **Example Appendix**

#### **A.1 Lists Including the Appendices**

The command

```
\showlistofappendices
```

must appear in the preamble if there are more than one appendices. For some reason, Rackham does not want the individual appendices and their sections to appear in the Table of Contents, so a special List of Appendices page (which must occur in the Table of Contents!) is required as a sort of extension to the Table of Contents.
